About Us

The Content Areas

We specialize in expanding current and emerging executive leaders' capacities and effectiveness in leadership, change, and communication strategies by teaching them how to guide and nurture the human spirit.

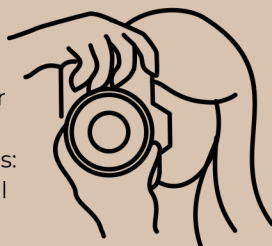

The Theories

We develop and implement strategies in alignment with spiritual leadership, workplace spirituality, and spiritual change readiness theories that focus on one's individual calling and membership within organizations.

The Lenses

We present content using one of three lenses that is best suited for our client's mission, vision, and organizational (or personal) values: Christian, Faith-Based, or Spiritual (Universal Connectedness).

The Perspectives

Every leadership, change, or communication strategy we develop considers all of three perspectives: heartpreneurship (how we lead ourselves), leadership (how we lead others), and followership (how others lead us).
